PROFESSIONAL SUMMARY

Senior Power BI Developer and Microsoft Certified Power BI Data Analyst (PL-300) with 8+ years of experience in Business Intelligence, data modelling, SQL development, and ETL across Finance, Retail, Telecommunications, Entertainment, and Technology. Expert in Power BI (Desktop, Service), Microsoft Fabric, advanced DAX, Power Query (M), star schema and composite semantic models, and data warehousing on SQL Server and Snowflake. Administers Power BI for 500+ users with Row-Level Security (RLS), workspace governance, and capacity management; led legacy BI to Power BI migrations; and builds Fabric Translytical Task Flows for write-back reporting. Applies AI-assisted development (Claude, Copilot for Power BI) to cut development time by 30%, and drives performance tuning, documentation, self-service BI, stakeholder management, and mentoring.

CORE SKILLS

Power BI & Fabric: Power BI Desktop, Power BI Service, Microsoft Fabric, OneLake, Semantic Models, Composite Models, Star Schema, Data Modelling, Advanced DAX, Time Intelligence, Power Query (M), Paginated Reports, Translytical Task Flows, User Data Functions (UDFs), Power Automate

Performance Optimization: DAX Optimization, Query Optimization, Performance Analyzer, DAX Studio, Tabular Editor, Semantic Model Health Checks

Data & Engineering: SQL, Microsoft SQL Server, T-SQL, Stored Procedures, Query Tuning, Snowflake, Microsoft Azure, Data Warehousing, Dimensional Modelling, ETL, IBM DataStage

BI Administration & Governance: Row-Level Security (RLS), Power BI Administration, Workspace Governance, Access Provisioning, App Deployment, Refresh Monitoring, Fabric Capacity Management, Data Governance

Analytics & Reporting: KPI Development, Financial Reporting, Budget vs Actuals, Variance Analysis, YoY / MoM Analysis, MIS Reporting, Self-Service Analytics, Data Visualization, Data Storytelling

Other BI Tools: MicroStrategy, IBM Cognos, ServiceNow (reporting integration)

AI-Assisted BI: Copilot for Power BI, Claude AI, AI-Assisted DAX Development, Automated Technical Documentation

Consulting & Delivery: Requirements Gathering, Business Analysis, Stakeholder Management, KPI Definition, Agile/Scrum, Technical Documentation, End-User Training, Mentoring, Code Reviews, BI Migration

PROFESSIONAL EXPERIENCE

Senior Business Intelligence Specialist | EG India (EG A/S), Mangaluru, India **Oct 2025 – Present**

- Lead design of a centralized Power BI semantic model using Composite Models, giving 10+ Group Finance reports a single governed, reusable source of truth.
- Built action-driven Power BI reports on Microsoft Fabric using Translytical Task Flows and User Defined Functions, including a write-back employee feedback system and a RAID tracker.
- Administer the Power BI tenant end to end – workspace governance, access provisioning, RLS, app deployment, refresh monitoring, and capacity management – across 4+ workspaces and 500+ users.
- Gather requirements with Finance stakeholders and translate them into self-service analytics adopted across the organization.
- Use AI-assisted development (Claude, Copilot) for DAX optimization, semantic model health checks, and documentation, reducing development time by 30%.
- Automated semantic model technical documentation (measures, relationships, RLS roles) with AI-assisted generation and human review, reducing documentation effort by ~60%.
- Run semantic model training sessions for business users, driving self-service BI adoption and reducing ad-hoc report requests by ~30%.

IT Analyst – Power BI Developer | Tata Consultancy Services (TCS), Bengaluru, India **Mar 2022 – Sep 2025**

Client: Global Entertainment Company

- Built a Power BI SLA dashboard integrated with ServiceNow for real-time tracking of ticket lifecycle and SLA compliance across 5+ support teams.
- Delivered service-level dashboards to senior management, improving accountability and response times.

Client: Telecommunications & Technology Services

- Led migration of a high-impact Sales Trend dashboard from a legacy BI platform to Power BI; received formal management recognition for delivery speed and quality.
- Redesigned Power BI data models and reporting architecture, reducing report refresh time by ~40%.

Client: Grocery & Natural Foods Retailer

- Developed Power BI dashboards with advanced DAX and SQL transformations to track sales, revenue growth, and multi-unit KPIs across 8+ business units.
- Implemented Row-Level Security (RLS) for role-based data access across stakeholder groups, ensuring data governance compliance.
- Optimized data models and DAX queries, reducing dashboard load time from ~10 to ~5 seconds.
- Worked in Agile sprints with business stakeholders to gather requirements, validate solutions, and drive dashboard adoption.

Client: Retail Enterprise

- Developed and optimized Power BI and MicroStrategy dashboards for enterprise-wide KPI tracking of sales trends, revenue, and operations.
- Built ETL pipelines on Snowflake and IBM DataStage, improving data integration speed and on-time data delivery to BI platforms.
- Ran requirements workshops to deliver scalable, customized BI solutions aligned with business objectives.

Senior Software Developer | Winman Software India LLP, Mangaluru, India **Sep 2018 – Feb 2022**

- Tuned SQL Server queries through indexing and refactoring, reducing execution time by ~50%.
- Designed ETL programs, stored procedures, and data pipelines loading multiple source systems into reporting data warehouses.
- Integrated reporting and analytics features into legacy ERP systems, enabling real-time, self-service reporting across business units.
- Resolved software and data issues end to end within SLA, and documented fixes for knowledge sharing.
- Mentored 4 junior developers, conducted code reviews, and introduced standard development practices that improved code quality.

PROJECTS

Sales Analytics Dashboard – Optics & Photonics Industry

- Designed Power BI dashboards tracking company, regional, and office-level sales with drill-through and dynamic filtering.
- Built complex DAX measures for KPIs including AR, Unity, Multiple, Remake Rate, Material, Progressive Lenses, and insurance claim trends, enabling self-service analytics for leadership.

CERTIFICATIONS

- Microsoft Certified: Power BI Data Analyst Associate (PL-300) – Microsoft

EDUCATION

Bachelor of Engineering (B.E.), Electronics and Communication Engineering **2014 – 2018**

Shri Madhwa Vadiraja Institute of Technology & Management, Bantakal, Karnataka, India

PUBLICATION

Environmental Parameters Monitoring via Smart Glass – Academic Publication, B.E. Final Year Project
